Summary of our Industry

GEMS AND JEWELLERY INDUSTRY OVERVIEW

INTRODUCTION

As of February 2021, India's gold and diamond trade contributed ~7.5% to India's Gross Domestic Product (GDP) and 14% to India's total merchandise exports. The gems and jewellery sector are likely to employ ~8.23 million persons by 2022, from ~5 million in 2020. Based on its potential for growth and value addition, the Government declared the gems and jewellery sector as a focus area for export promotion.

The Government has undertaken various measures recently to promote investment and upgrade technology and skills to promote 'Brand India' in the international market. The Government has permitted 100% FDI in the sector under the automatic route, wherein the foreign investor or the Indian company do not require any prior approval from the Reserve Bank or the Government of India. The Indian Government also signed a Comprehensive Economic Partnership Agreement (CEPA) with the United Arab Emirates (UAE) in March 2022, this will allow the Indian Gems and Jewellery industry to further boost exports. CEPA will provide the industry with duty-free access to the UAE market. India's Gems Jewellery Export Promotion Council (GJEPC) aims to triple its exports to the UAE post the CEPA.

2. *Our inability to manage growth could disrupt our business and reduce our profitability.*

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses. As part of its strategic growth plan, Our Company proposes to increase its geographical location of operations by setting up a retail showroom in Agra. For details, please refer page no. 63 of the Prospectus. Further, the company is under the process of creating an additional online platform, i.e. www.baubleberry.com to sell its products online. Through this platform, our company envisions expanding the Baubleberry platform to showcase and collaborate with other small and mid-sized boutique jewellery brands in the near future. This unique "shop-in-shop" concept aims to offer a curated selection of distinctive jewellery pieces, providing customers with a diverse and inspiring shopping experience. We believe that the key to a successful business and building a brand is to reach out to newer customers, understand their requirement and deliver them the best of the products. Opening of a new showroom and selling through digital platform and managing them as a part of our strategy will require efficiency at various levels and will be determined by various factors. We cannot assure we may be able to successfully implement the strategy and efficiently execute the plans towards the objects and our inability to effectively plan, manage and execute our current operations and also our growth strategy may adversely affect our business, financial conditions and results of operations.

3. *The non-availability or high cost of quality gold bullion, silver, diamonds and other precious and semi-precious stones may have an adverse effect on our business, results of operations and financial condition.*

Timely procurement of materials such as gold bullion, silver, diamonds and other precious and semi-precious stones, as well as the quality and the price at which they are procured, play an important role in the successful operation of our business. Gold used in our operations, is primarily sourced from bullion dealers and wholesaler. An increase in the price of gold may result in an increase in our income from sales assuming such increases do not adversely affect sales volumes. However, a significant increase in the price of gold or a negative outlook on future gold prices could, in the short term, adversely affect our sales volumes. We may also require specific

quality raw materials including silver, precious and semi-precious stones for specific jewellery design. Accordingly, our business is affected by the availability, cost and quality of raw materials. A sudden fall in the market price of diamonds and other precious and semi-precious stones may affect our ability to recover our procurement costs. Conversely, an increase in the price of diamonds and other precious and semi-precious stones could lead to a decrease in demand for a particular jewellery and/or a decrease in our profit margins. We cannot assure you that we will be able to procure quality raw materials at competitive prices or at all. Further, any rise in prices of raw materials used by us may cause customers to delay their purchases, thereby adversely affecting our business, operations and financial condition. There have been no such instances in the past wherein the Company unable to procure gold for the purpose of its business.

- 4. *We may be unable to maintain or establish arrangements with job workers and suppliers through whom we manufacture our products and procure raw materials, and may experience other disruptions or quality control risks in the operations of such parties.***

We manufacture our products through our network of job workers and procure raw materials from bullion dealers and wholesaler. We do not have any format contract or agreement with our supplier and while we place orders with our list of them, they are not contractually bound to deal with us exclusively, and we may face the risk of our competitors offering better terms, which may cause them to prefer our competitors over us. Our arrangements with these job workers and suppliers could involve various risks, including potential interruption to their operations for factors beyond their or our control, any significant adverse changes in their financial or business condition, as well as low levels of output, quality or efficiency. Any disruption in the operations of these job workers or suppliers could have an adverse impact on our financial condition and results of operations.

- 5. *Our failure to accurately forecast and manage inventory could result in an unexpected shortfall and/or surplus of products, which could harm our business.***

We monitor our inventory levels based on our own projections of future demand. Because of the length of time necessary to produce commercial quantities of our products, we must make production decisions well in advance of sales. An inaccurate forecast of demand for any product can result in the unavailability/surplus of products. This unavailability of products in high demand may depress sales volumes and adversely affect customer relationships. Conversely, an inaccurate forecast can also result in an over-supply of products, which may increase costs, negatively impact cash flow, reduce the quality of inventory, erode margins substantially and ultimately create write-offs of inventory. There may be more than one such inaccurate forecasts in one season. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

- 6. *We may fail to attract and retain qualified designers and craftsmen as competition for skilled personnel is intense.***

The industry in which we operate is labour intensive and our success depends in large part upon our ability to attract, hire, train and retain qualified designers and craftsmen. While we believe we have a satisfactory working relationship with our labourers and employees, we remain subject to the risk of labour disputes and adverse employee relationships. These potential disputes and adverse relations could result in work stoppages or other events that could disrupt our business operations or the development of our projects, which could have a material adverse effect on our business, financial condition or results of operations.

Further, there is significant competition for professionals in India with skills necessary to perform the services. Increased competition for these professionals could have an adverse effect on us. High attrition rates among designers and craftsmen could result in a loss of domain and process knowledge, which could result in poor products. A significant increase in the turnover rate would increase our recruiting and training costs and decrease our operating efficiency, productivity and profit margins and could lead to a decline in demand for our products.

- 7. *We are dependent upon few suppliers for the material requirements of our business. Further, we do not have definitive agreements or fixed terms of trade with most of our suppliers. Failure to successfully leverage our relationships with existing suppliers or to identify new suppliers could adversely affect our business operations.***

Our top 10 suppliers contributed 93.60%, 91.65%, 98.53% and Nil of the purchases for the period ending on December 31, 2023 and for the financial year ending on March 31, 2023, 2022 and 2021, respectively. Further,

as on March 31, 2021, due to the outbreak of Coronavirus (COVID-19) pandemic globally and in India and restriction/ constriction on the purchase and sale of gold, silver, precious stone, semi-precious stone, our company had not purchased any additional inventory and sold its existing inventory itself. In our industry, generally there are no definitive agreements with the suppliers of the products we sell. We also do not have any long-term supply agreements with our suppliers or distributors and we procure our products on a purchase order basis. Since there are no fixed terms of trade, the discounts and schemes for our customers are decided based on the negotiation skills of the procurement team. If we are unable to continue to procure supplies at competitive prices, our margins and business will be adversely affected. Any problems faced by our supplier resulting in delays or non-adherence to quality requirements could adversely impact our ability to meet our customer's requirements in time and our operations would be affected to the extent we are unable to line up supplies from alternate suppliers. If we fail to successfully leverage our existing and new relationships with suppliers, our business and financial performance could be adversely affected.

8. *We have a history of net losses and we anticipate that may continue in the future.*

We have incurred restated loss of Rs. 13.06 Lakhs in Fiscals 2021. Though we have been profitable at the operational level, losses during above period were mainly due to past losses being carried forward. The past losses were incurred due to the COVID-19 pandemic, high interest cost and administrative and selling expenses and drastic reduction in the revenue from operations. For further details, see “**Annexure 7-Statement of Reserves and Surplus**” on page 138 of the Prospectus. Historically, our company has earned its revenues from wholesale trading of gold, silver, precious stone, semi-precious stone and from sales of jewellery. Besides the above, our company has also entered into business of manufacturing of jewellery through the job worker from this Fiscal 2024. Due to the reasons mentioned above, the revenue from operations has substantially increased as compared from Fiscal 2021 to Fiscal 2022, 2023 and 2024. We have expended and expect to continue to expend substantial financial and other resources on, among others, manufacturing, marketing and sales promotion costs to attract customers. These efforts may be costlier than we expect and may not result in increased revenue or growth in our business. Any failure to increase our revenue sufficiently to keep pace with our growth and other expenses could prevent us from achieving profitability or positive cash flow on a consistent basis. If we are unable to generate adequate revenue growth and manage our expenses and cash flows, we may continue to incur significant losses in the future.

9. *If we are unable to attract new clients or retain our existing clients or default in payments, the growth of our business and cash flows will be adversely affected.*

Default or delays in payments by a significant portion of our customers may have an adverse effect on cash flows, results of operations and financial condition. Default or delays in payments by a significant portion of our customers may have an adverse effect on cash flows, results of operations and financial condition. However, our top 10 customers contributed 98.98%, 79.66%, 95.96% and 100% of our revenues from operations for the period ended December 31, 2023 and for the year ended March 31, 2023, 2022 and 2021, respectively. To increase our revenue and cash flows, we must regularly add new clients. If we are unable to generate sufficient sales leads through our marketing programs, or if our existing or new clients do not perceive our services to be of sufficiently high value and quality, we may not be able to increase sales and our operating results would be adversely affected. In addition, our existing clients have no obligation to repeat contracts / new projects to us due to various factors including clients satisfaction with our services, collection of data and information as desired by our clients, our prices and the prices of competing service providers. If we fail to achieve repetitive projects from existing clients or to add new clients, our operating results will suffer, and our revenue growth, cash flows and profitability may be materially and adversely affected.

10. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for, which may have an adverse effect on our business, financial condition and thereby on our results of operations.*

We may encounter predicaments in executing the orders placed by our customer or executing it on a timely basis. Moreover, there are factors which may be beyond our control or in the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, which may result in the postponement of executing or delivering of the necessary product(s) or cause its cancellation. Further, even though we execute orders as placed by our customers, the order could be cancelled or there could be any changes in delivery of the products. Accordingly, it is difficult to predict with certainty if, when and to what extent the delivery of the orders placed will be made. Failure to deliver our orders on time could

lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our revenue, cost of operation and thereby our business functioning.

11. Our inability to respond to changes in consumer demands and market trends in a timely manner and to maintain optimal level of inventory may impact our operations adversely.

Our success depends on our ability to identify, originate and define product and market trends, as well as to anticipate, gauge and react to rapidly changing consumer demands in a timely manner. Our products must also appeal to a broad range of customers whose preferences may vary significantly across regions and age group of customers and cannot be predicted with certainty. We cannot assure you that the demand for our products with end-consumers will continue to grow or that we will be able to continue to develop appealing styles or meet rapidly changing consumer demands in the future. If we misjudge the market for our jewellery products or fail to anticipate a shift in consumer preferences, we may be faced with a reduction in revenues. Customer preferences could be affected by a variety of issues, including promotion of specific types of jewellery by the fashion industry, such as the promotion of silver over traditional jewellery other type of jewellery, a decrease in the perceived value and customer satisfaction of the jewellery compared to its price, the availability of alternate metals and consumer attitudes towards the substitution of some of the products or a shift in customer preference to other luxury products. Any inability to respond to changes in consumer demands and market trends in a timely manner could have a material adverse effect on our business, financial condition and results of operations.

12. Any deficiency in our products & services could make our Company liable for client claims, which in turn could affect our Company's results of operations.

Our Company is bound by the terms and conditions as placed before its clients. There are no specific regulations governing the supply of the same, other than the general law of contracts. Any claims made by these clients for deficiency in our products and services, would be subject to these terms and conditions, which are in the nature of normal contractual obligations in India. Any violation of these obligations could impact our Company's results of operations.

13. If we are unable to introduce new designs of our products in line with the changing consumer preferences and market trends, we may face decline in demand for our products.

Jewellery business is subject to changing consumer patterns and preferences, which is difficult to predict. We are required to constantly improvise our product designs, understand consumer tastes and preferences focus on innovative designing and introduce new designs and patterns to meet the changing consumer needs. If we are unable to meet consumer expectations, it may adversely affect our competitiveness, reduce our market share, lead to higher inventory costs and decrease our sales.

14. We may fail to protect our jewellery designs.

We change our jewellery designs on a regular basis and do not register such designs under the Design Act, 2000. As such, it would be difficult for us to enforce our intellectual property rights in our designs, and if our competitors copy our designs, in particular the designs of our products available on our website or the designs given to third-party job workers/ suppliers, it could lead to a loss of revenue, which could adversely affect our results of operations and financial condition. If our suppliers produce the same or similar jewellery for our competitors, our customers may no longer purchase our jewellery or look to our competitors for similar jewellery, which could negatively impact our results operations and financial condition. Additionally, designs developed by us may inadvertently infringe on the intellectual property rights of third parties, which may expose us to legal proceedings. Thus, we are susceptible to litigation for infringement of intellectual property rights in relation to such designs. This could materially and adversely affect our reputation, results of operations and financial condition.

15. Our income and sales are subject to seasonal fluctuations and lower income in a peak season may have a disproportionate effect on our results of operations and may have a negative impact on our business.

Our sales have historically exhibited certain seasonal fluctuations, reflecting higher sales volumes and profit margins during festival periods and other specific occasions such as Akshay Trithiya, Dussehra, Dhanteras, Diwali and Christmas. Any slowdown in demand for our jewellery during peak seasons or failure by us to

accurately anticipate and prepare for such seasonal fluctuations could have a material adverse effect on our business, financial condition and results of operations.

16. *Our proposed e-commerce business may face distinct risks, and our failure to successfully manage those risks could have a negative impact on our profitability.*

Our company is under the process of creating an additional online platform, i.e. www.baubleberry.com to sell its products online. Through this platform, our company envisions expanding the Baubleberry platform to showcase and collaborate with other small and mid-sized boutique jewellery brands in the near future. This unique "shop-in-shop" concept aims to offer a curated selection of distinctive jewellery pieces, providing customers with a diverse and inspiring shopping experience. We believe that by providing our wide range of products for sale on our Company e-commerce platform will add an advantage to our growth and scale up our existing business. Our e-commerce platform will provide us the leverage and the bandwidth to reach out to customers across various part of the globe. However, e-commerce platform runs on technology that requires continuous upgradation and innovation at various levels & intervals and also involves an amount of risk attached to it. Similarly, the technology of the e-commerce segment of our business is exposed to certain risks and any failure on our part to manage or mitigate such risk can disrupt our e-commerce business or platform and may have an adverse effect on our profitability and result of operations.

17. *Strong competition in the jewellery sector could decrease the market share and compel the company to either reduce the cost charged or increase the payments made to the job workers. This may have an adverse impact on the enrolments, revenues and profitability.*

The jewellery sector is highly fragmented and competitive. The Company would not only compete with organized players but also a high percentage of unorganized entities such as individual jeweler's, retailer stores, jewellery showrooms and galleries and small scale companies. Some of them may offer better designs and patterns to the clients and may be capable of providing more personalized services to each client due to the smaller number of orders placed with them. Further, these unorganized entities offer their services at highly competitive prices having well established presence in their local markets. Aggressive discounting by competitors, including liquidating excess inventory, may also adversely impact our performance in the short term. This is particularly the case for easily comparable pieces of jewellery, of similar quality, sold through stores that closely resemble to those that we operate. In addition, there are minimal entry barriers in this sector and hence we may also face competition from new entrants.

18. *We have not registered the trademarks which we are using for our business. We may be unable to protect our intellectual property or knowhow from third party infringement which could harm our brand and services.*

The company is required to make an application to the Trade Mark Registry, Mumbai to register its brands including the company name and logo. However, our company has made application for registration of its trademarks. While filing application for registration if the same is not accepted or if there are oppositions filed against the trademark application if any, are successful, our company may lose the statutory protection available to it under the Trade Marks Act, 1999 for such trademarks.

Further, few of the trademarks under the name BaubleBerry was registered under the name of one of our Promoter Group Entity i.e. Jaipur Jewels Global Limited (JJGL) w.e.f. November 27, 2019. In order to transfer the right, titles, interest and ownership in and above said trademark, our company has executed a Deed of Assignments of trademark dated September 04, 2023 with JJGL and has also obtained the NOC from JJGL. In order, to register the above trademark under our company's name, we have made an application with the Registrar of Trademarks, Mumbai which is under process.

For details, please refer to the chapter titled "Government and other Approvals" beginning on page no. 58 of the Prospectus. In case our Promoter Group Entity withdraws its NOC or assign the said trademark to any other third party, our sales, business operations and financial conditions will be affected.

19. *Our business is partly dependent on factors affecting consumer spending that are out of our control.*

Purchase of metals, precious stones, semi- precious stones, gems and Jewellery purchases are discretionary and are often perceived to be an exercise in luxury. As a result, our business is sensitive to a number of factors that

influence consumer spending. The price of jewellery relative to other products, everyday household as well as luxury items, influences the conditions, consumer confidence in future economic and political conditions, economic slowdown or fears of economic slowdown, consumer debt, disposable consumer income, conditions in the housing market, consumer perceptions of personal well-being and security, fuel prices, inclement weather, interest rates, sales tax rate increases, inflation, and war or fears of war. In addition, we compete with other retail categories, for example electronics, travel, etc. for consumers' discretionary expenditure. Therefore, the price of jewellery relative to other products influences the proportion of consumers' expenditure that is spent on jewellery.

38. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet.*

We have not commissioned an industry report, for the disclosures which need to be made in the chapter titled “Industry Overview” of this Prospectus. We have made disclosures in the said chapter on the basis of the relevant industry related data available online. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Prospectus. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Accordingly, investors should read the industry related disclosure in this Prospectus in this context.

39. *The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.*

An outbreak of COVID-19 was recognized as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Since May 2020 many of these measures have been lifted. We proactively engaged with our clients to reassure them and to demonstrate our commitment to restart our operations and to build confidence in the safety protocols deployed at our stores. Further, the lockdown was again imposed by the government in some parts of India during April 2021, which was partially relaxed in June 2021, during this period of lockdown and relaxation, our stores were partially operational. If we do not respond appropriately to the pandemic, or if customers did not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future.

We cannot predict the degree to, or the time period over, which our business will be affected by the COVID-19 outbreak. For example, this pandemic could necessitate further lockdowns, resulting in significant additional effects on our revenue, financial condition and results of operations. There are numerous uncertainties associated

with the COVID-19 outbreak, including the number of individuals who will become infected, availability of a vaccine or a cure that mitigates the effect of the virus, the extent of the protective and preventative measures imposed by governments and whether the virus' impact will be seasonal, among others. Consequently, there may be adverse effects of this pandemic on our short-term business operations and our financial results may be impacted.

40. *The requirements of being a listed company may strain our resources.*

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI (LODR) Regulations, which require us to file audited / unaudited reports periodically with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, for which significant resources and management overview will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate and relevant experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner or at all.

EXTERNAL RISK FACTORS

41. *Changes changes in the regulatory framework could adversely affect our operations and growth prospects.*

The company is subject to various regulations and policies. For details see section titled "Key Industry Regulations" beginning on page no. 93 of this Prospectus. The company's current businesses and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that it will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which could have a material adverse effect on the business, financial condition and results of operations.

42. *We Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Our financial statements, including the financial statements provided in this Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see "Presentation of Financial, Industry and Market Data" on page no. 13 of this Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the

Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition

43. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

44. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

45. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

46. Any downturn in the macroeconomic environment in India could adversely affect our business, results of operations, cash flows and financial condition.

India is our key market. For Fiscal 2023, entire of our Company's revenue from operations was from India. In addition, an increase in India's trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could increase interest rates and adversely affect liquidity, which could adversely affect the Indian economy and our business, results of operations, cash flows and financial condition.

47. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India, or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

48. Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.

After the completion of our Initial Public Issue, our Promoters, along with our Promoter Group members, will hold, approximately 72.03 of our post issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company's or your best interests. For further details, please refer to the chapters titled "Capital Structure" and "Our Promoter and Promoter Group", beginning on page no. 49 and 117 respectively, of this Prospectus.

49. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

50. Our Company has not paid any dividends in the past and we may not be able to pay dividends in the future.

We have not paid any dividends on our Equity Shares since inception and there can be no assurance that dividends will be paid in future. The declaration of dividends in the future will be recommended by our Board, at its sole discretion, and will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to pay dividend in the future. Further, we may be restricted by the terms of our debt financing from making dividend payments, in the event we default in any of the debt repayment installments.

51. *Investors may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to, however notify the transactions which would be exempt from the application of this new amendment. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to applicable short-term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For more details, please refer to "Statement of Tax Benefits" on page no. 69 of this Prospectus.

52. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. SCVM Securities Private Limited is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the section titled "General Information – Details of the Market Making Arrangement for this Issue" on page no. 41 of this Prospectus.

53. *Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges.*

There has been no public market for our Equity Shares prior to the Offer. The price may not necessarily be indicative of the market price of our Equity Shares after the Offer is completed. You may not be able to re-sell your Equity Shares at or above the Offer price and may as a result lose all or part of your investment.

Our Equity Shares are expected to trade on SME Platform of BSE after the Offer, but there can be no assurance that active trading in our Equity Shares will develop after the Offer, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

The price at which our Equity Shares will trade at after the Offer will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows;
- The history of and prospects for our business;

- An assessment of our management, our past and present operations, and the prospects for as well as timing of our future revenues and cost structures; and
- The valuation of publicly traded companies that are engaged in business activities similar to ours;
- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations, or capital commitments;
- announcements of significant claims or proceedings against us;
- new laws and government regulations that directly or indirectly affect our business;
- additions or departures of Key Management Personnel;
- changes in the interest rates;
- fluctuations in stock market prices and volume; and general economic conditions.

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.

GLOBAL ECONOMY – OVERVIEW

Global growth is projected to fall from an estimated 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024. While the forecast for 2023 is modestly higher than predicted in the April 2023 World Economic Outlook (WEO), it remains weak by historical standards. The rise in central bank policy rates to fight inflation continues to weigh on economic activity. Global headline inflation is expected to fall from 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.

The recent resolution of the US debt ceiling standoff and, earlier this year, strong action by authorities to contain turbulence in US and Swiss banking reduced the immediate risks of financial sector turmoil. This moderated adverse risks to the outlook. However, the balance of risks to global growth remains tilted to the downside. Inflation could remain high and even rise if further shocks occur, including those from an intensification of the war in Ukraine and extreme weather-related events, triggering more restrictive monetary policy. Financial sector turbulence could resume as markets adjust to further policy tightening by central banks. China’s recovery could slow, in part as a result of unresolved real estate problems, with negative cross-border spillovers. Sovereign debt distress could spread to a wider group of economies. On the upside, inflation could fall faster than expected, reducing the need for tight monetary policy, and domestic demand could again prove more resilient.

In most economies, the priority remains achieving sustained disinflation while ensuring financial stability. Therefore, central banks should remain focused on restoring price stability and strengthen financial supervision and risk monitoring. Should market strains materialize, countries should provide liquidity promptly while mitigating the possibility of moral hazard. They should also build fiscal buffers, with the composition of fiscal adjustment ensuring targeted support for the most vulnerable. Improvements to the supply side of the economy would facilitate fiscal consolidation and a smoother decline of inflation toward target levels.

INDIAN ECONOMY OVERVIEW

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India’s recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the

digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

MARKET SIZE

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GEMS AND JEWELLERY INDUSTRY OVERVIEW

INTRODUCTION

As of February 2021, India's gold and diamond trade contributed ~7.5% to India's Gross Domestic Product (GDP) and 14% to India's total merchandise exports. The gems and jewellery sector are likely to employ ~8.23 million persons by 2022, from ~5 million in 2020. Based on its potential for growth and value addition, the Government declared the gems and jewellery sector as a focus area for export promotion.

The Government has undertaken various measures recently to promote investment and upgrade technology and skills to promote 'Brand India' in the international market. The Government has permitted 100% FDI in the sector under the automatic route, wherein the foreign investor or the Indian company do not require any prior approval from the

Reserve Bank or the Government of India. The Indian Government also signed a Comprehensive Economic Partnership Agreement (CEPA) with the United Arab Emirates (UAE) in March 2022, this will allow the Indian Gems and Jewellery industry to further boost exports. CEPA will provide the industry with duty-free access to the UAE market. India's Gems Jewellery Export Promotion Council (GJEPC) aims to triple its exports to the UAE post the CEPA.

MARKET SIZE

India's gems and jewellery market size was at US\$ 78.50 billion in FY21. Growth in exports is mainly due to revived import demand in the export market of the US and fulfilment of orders received by numerous Indian exhibitors during the Virtual Buyer-Seller Meets (VBSMs) conducted by GJEPC.

India's gems and jewellery exports reached US\$ 39.14 billion in 2021-22, a 54.13% rise from the previous year. In December 2022, India's gems and jewellery exports was at US\$ 2.56 billion. GROWTH DRIVERS AND OPPORTUNITIES

Growth drivers of gems & jewellery sector in India

High gold demand in India acts as a major driver for growth and opportunity

- According to Gem and Jewellery Export Promotion Council, between April-December 2022, imports of gold bars stood at US\$ 1,849 million and gold jewellery stood at US\$ 216 million.
- India's gold demand stood at 800 tonnes in 2023.
- The third and fourth quarters of 2022 have been better for businesses, as compared to the first two quarters. Total jewellery demand in terms of volume in the third quarter of 2022 stood at 146.2 tonnes, while it stood at 219.7 tonnes in the fourth quarter.

Government initiatives and regulatory framework

1. Gems and jewellery industry related to duties and taxes

- In the Union Budget 2023-24, the government proposed to increase the import duty on silver dore, bars, and articles to 10% to align them with that of gold and platinum.

2. FDI Policy

- The Government has permitted 100% FDI in the sector under the automatic route, wherein the foreign investor or the Indian company do not require any prior approval from the Reserve Bank or Government of India.

3. Demonetisation

- The demonetisation move is encouraging people to use plastic money and debit/ credit cards for buying jewellery. This is good for the industry in the long run and will create more transparency.
- The Government would notify a new limit for reporting about transactions in gold and other precious metals and stones to authorities to avoid the parking of black money in bullion.

4. Gold spot exchange

- The government's announcement on establishing gold spot exchange could help in India's participation in determining gold price in the international market.

5. BIS Hallmarking Scheme

- The gold jewellery hallmark will now carry a BIS mark, purity in carat and fitness as well as the unit's identification and the jeweller's identification mark. The move is aimed at ensuring a quality check on gold jewellery.
- The Government made hallmarking mandatory for Gold Jewellery and Artefacts. A period of one year is provided for implementation, i.e. until January 2021.
- In August 2020, the Indian government launched an online registration and renewal system for 'Jewellers & Hallmarking' centres. This online system can be accessed via BIS web portal (www.manakonline.in)

6. Gold Monetisation Scheme

- The Gold Monetisation Scheme was launched in November 2015. This scheme enabled individuals, trusts and mutual funds to deposit gold with banks and earn interest on the same in return.
- As of January 2019, the Reserve Bank of India (RBI) increased the scope of the gold-monetisation scheme by allowing charitable institutions and Government entities to deposit gold to boost deposits over the coming months.

7. Mandatory hallmarking regime

- In December 2020, All India Gem and Jewellery Domestic Council (GJC) welcomed the decision to make hallmarking compulsory from June 2021 in a phased manner; urged the government to examine the key concerns of the industry for smooth implementation of the initiative.
- Hallmarking of gold jewellery is set to begin from June 15, 2021. In view of the COVID-19 pandemic, the government accepted request of stakeholders to provide jewellers some more time to prepare for implementation and resolve issues. Earlier, the date of implementation was June 01, 2021.

8. Prevention of Money Laundering Act (PMLA)

- In December 2020, the Finance Ministry notified that the amendment under Prevention of Money Laundering Act (PMLA), notifying dealers in precious metals and stones, will maintain records of cash transactions worth US\$ 13.61 thousand (Rs. 10 lakh) or more cumulatively with a single customer.

9. Special Group

- In August 2020, the government called for constituting a special group, which will include both customs and banking officials, to resolve issues faced by the gem and jewellery sector.

10. EDI (Electronic Data Interchange) Connectivity of Postal Service with Customs in e-commerce Policy

- In December 2020, the Gem and Jewellery Export Promotion Council (GJEPC) urged the government to include in the
- comprehensive e-commerce policy the EDI connection of postal services with customs, to enable banks to automatically close ecommerce exports against advance credit card payments by foreign purchasers.

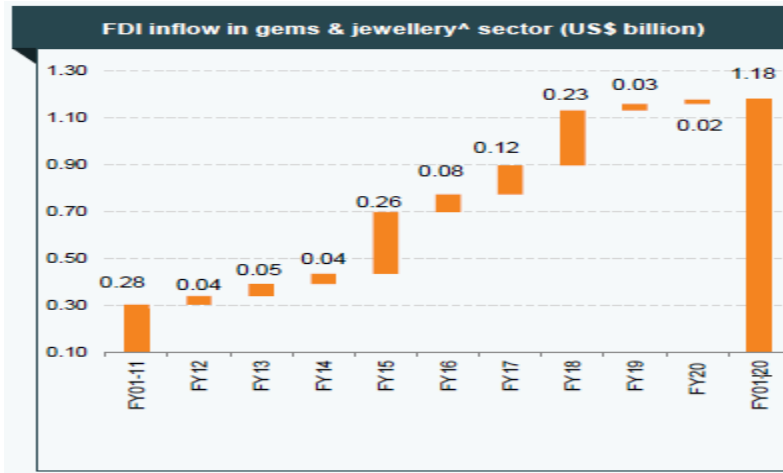

- The step would drive for progressive reforms to help the industry fulfil its long-term goal of being the epicentre of global gems & jewellery.

11. Suspension of additional tariff on goods by the US

- In June 2021, the US suspended additional tariffs on six countries, including India, that have imposed or are considering equalisation levy/digital services tax on e-commerce companies for up to six months. This was done to provide additional time to complete the ongoing multilateral negotiations on international taxation at the Organisation for Economic Co-operation and Development (OECD) and G20.
- The suspension is likely to provide relief to the COVID-hit gems & jewellery sector in India.

Increasing FDI inflows into the sector

- The total foreign direct investment (FDI) inflows in the gems and jewellery sector during 2021-22 stood at US\$ 58.77 billion.
- The Government of India permitted 100% FDI in the sector through an automatic route.
- The US\$ 35.77 billion (Rs. 250,000 crore) big household jewellery industry is probably going to get a major lift through the government’s decision for FDI in retail.

ROAD AHEAD

In the coming years, growth in the gems and jewellery sector would largely be contributed by the development of large retailers/brands. Established brands are guiding the organised market and are opening opportunities to grow. Increasing penetration of organised players provides variety in terms of products and designs. Online sales are expected to account for 1–2% of the fine jewellery segment by 2021–22. Also, the relaxation of restrictions on gold import is likely to provide a fillip to the industry.

The improvement in availability along with the reintroduction of low-cost gold metal loans and likely stabilisation of gold prices at lower levels is also expected to drive volume growth for jewellers over the short to medium term. India has 450 organised jewellery manufacturers, importers & exporters and is the hub for jewellery manufacturing. These players have benefited greatly due to the increasing liberal policies by the government. The demand for jewellery is expected to be significantly supported by the recent positive developments in the industry. India’s gems and jewellery industry is expected to reach US\$ 100 billion by 2027.

The financial statements are prepared and presented under the historical cost convention and evaluated on a going-concern basis using the accrual system of accounting in accordance with the accounting principles generally accepted in India (Indian GAAP) and the requirements of the Companies Act, including the Accounting Standards as prescribed by the Companies (Accounting Standards) Rules, 2014 as per section 133 of the Companies Act, 2013.

2. USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles ('GAAP') in India requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of the financial statements, and the reported amount of revenue and expenses during the reporting period. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements which in management's opinion are prudent and reasonable. Actual results may differ from the estimates used in preparing the accompanying financial statements. Any revision to accounting estimates is recognized prospectively in current and future periods.

3. FIXED ASSETS

Fixed assets are stated at historical cost less accumulated depreciation and impairment losses. Cost includes purchase price and all other attributable cost to bring the assets to its working condition for the intended use.

Subsequent expenditures related to an item of tangible asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

4. DEPRECIATION

Depreciation is provided on a straight line basis over the useful lives of assets, which is as stated in Schedule II of the Companies Act 2013 or based on technical estimation made by the Company.

Intangible assets are amortized over their estimated useful economic lives and validity.

5. BORROWING COSTS

Borrowing costs attributable to the acquisition or construction of a qualifying asset are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are recognized as an expense in the period in which they are incurred. Capitalization of borrowing costs is suspended during the extended period in which active development is interrupted. Capitalization of borrowing costs is ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete. Other borrowing costs are charged to statement of profit and loss as and when incurred.

6. IMPAIRMENT OF ASSETS

In accordance with AS 28 on 'Impairment of assets' as prescribed in the Companies (Accounting Standards) Rules, 2006, the Company assesses at each balance sheet date, whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. The recoverable amount of the assets (or where applicable that of the cash generating unit to which the asset belongs) is estimated as the higher of its net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of the assets and from its disposal at the end of its useful life. An impairment loss is recognized whenever the carrying amount of an asset or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment loss is recognized in the statement of profit and loss or against revaluation surplus, where applicable. If at the balance sheet date, there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is re-assessed and the asset is reflected at the recoverable amount subject to a maximum of the depreciated historical cost.

7. INVESTMENTS

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in the future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized only if there is virtual certainty of realization of such assets. Deferred tax assets are reviewed at each balance sheet date and written down or written up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realized.

15. CONTINGENT LIABILITIES AND PROVISIONS

When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligation, the provision is reversed. Contingent assets are not recognized in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognized in the period in which the change occurs.

BASIS OF ALLOTMENT

Allotment will be made in consultation with the SME Platform of BSE (The Designated Stock Exchange). In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth hereunder:

- 1) The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of Applicants in the category x number of Shares applied for).

- 2) The number of Shares to be allocated to the successful Applicants will be arrived at on a proportionate basis in marketable lots (i.e. Total number of Shares applied for into the inverse of the over subscription ratio).
- 3) For applications where the proportionate allotment works out to less than 1,000 equity shares the allotment will be made as follows:
 - i. Each successful Applicant shall be allotted 1,000 equity shares; and
 - ii. The successful Applicants out of the total applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.
- 4) If the proportionate allotment to an Applicant works out to a number that is not a multiple of 1,000 equity shares, the Applicant would be allotted Shares by rounding off to the nearest multiple of 1,000 equity shares subject to a minimum allotment of 1,000 equity shares.
- 5) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Applicants in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of 1,000 Equity shares, results in the actual allotment being higher than the shares offered, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the offer specified under the Capital Structure mentioned in this Prospectus.
- 6) Since present issue is a fixed price issue, the allocation in the net offer to the public category in terms of Regulation 253(2) of the SEBI (ICDR) Regulations, 2018 shall be made as follows:
 - a) Minimum fifty percent (50%) To Retail Individual Investors; and
